Provided details::

With the changes to the math program and classes, we are using a student-centered approach to teaching. As a result, the students get into groups on a regular basis. The desks we currently have are very difficult to move and put into groups. We have purchased these desks for 7 of our 9 classrooms and would like them for the last two classrooms. In addition, we need six more for three classrooms that have 40 seats and need to be raised to our classroom size of 42. As part of our Math Pathways program, we are changing the pedagogical practices we use in the classroom. This requires that we have the furniture that allows the class to easily get into groups and create a collaborative environment.
