Congratulations Class of 2018!

Former Pathway Academy and FYE (First Year Experience) students and mentors graduated and are transferring this Fall to the university of their choice. In the photo to the left we have **Eduardo Mangosing** (SDSU), **Marycruz Villaseñor** (CSULB), **Fernando Lucero** (SDSU), **Patrice Velez** (UCSB), **Alexis Pliego** (SDSU), **Dalia Valencia** (SDSU), **Rosa Buenrostro** (SDSU) and **Iveth Estrada** (UCLA) along with PA Coordinator, **Veronica Corral**.

GPS Training

Pathway Academy mentors participated in a two week peer mentoring training. These trainings included presentations from Cuyamaca College departments such as Mental Health, Career Technical Education, Admissions & Records, Library Resources, HSI Institutional Research, and community partners Yoga, and Restorative Justice.

Fridays

1:00 p.m - 5:00 p.m.

Sandy Gonzalez

Mondays

9:00 a.m. - 1:00 p.m.

Daniel Mendoza

Thursday

8:00 a.m.- 2:00 p.m.

Fridays

12:30 p.m. - 2:00 p.m.

Student Success Day

Monday • August 13, 2018

To gear up for the new Fall Semester, Pathway Academy students participated in Student Success day. They also attended a meet and greet where our incoming cohort had the opportunity to meet their new mentor. Students interacted through group activities and games. After the meet and greet, mentors and mentees engaged with a campus informational booth and played an exciting game of Family Feud with our very own Vice President of Student Services, Dr. Jessica Robinson.

Creating Scientists to Address Cancer Disparities Program

Rosa Buenrostro and Dalia Valencia participated in an internship program called “Creating Scientists to Address Cancer Disparities”. This internship allowed them to explore different issues related to cancer. Rosa and Dalia both worked in a research lab through San Diego State University under the supervision of Dr. Kristen Wells and Dr. Vanessa Malcarne

“ It was an overall great experience that gave us direction toward a future career in Psychology ”
ROSA BUENROSTRO

In this lab, they learned how to code qualitative data and transcribe patient interviews, as well as conduct literature research, compose a literature review, and create a poster on an issue related to cancer. Their participation in this program will allow them to attend the International Cancer Education Conference in October, where they will present their research and poster.
