

Chapter 4 Practice Test from the book

For Exercises 1–9, if a system has an infinite number of solutions, use set-builder notation to write the solution set. If a system has no solution, state this.

Solve by graphing.

$$\begin{array}{ll} 1. \quad 2x + y = 8, & 2. \quad 2y - x = 7, \\ \quad \quad y - x = 2 & \quad \quad 2x - 4y = 4 \end{array}$$

Solve using the substitution method.

$$\begin{array}{ll} 3. \quad x + 3y = -8, & 4. \quad 2x + 4y = -6, \\ \quad \quad 4x - 3y = 23 & \quad \quad y = 3x - 9 \end{array}$$

$$\begin{array}{l} 5. \quad x = 5y - 10, \\ \quad \quad 15y = 3x + 30 \end{array}$$

Solve using the elimination method.

$$\begin{array}{ll} 6. \quad 3x - y = 7, & 7. \quad 4y + 2x = 18, \\ \quad \quad x + y = 1 & \quad \quad 3x + 6y = 26 \end{array}$$

$$\begin{array}{ll} 8. \quad 4x - 6y = 3, & 9. \quad 4x + 5y = 5, \\ \quad \quad 6x - 4y = -3 & \quad \quad 6x + 7y = 7 \end{array}$$

Solve.

10. **Perimeter of a Garden.** Hassam is designing a rectangular garden with a perimeter of 66 ft. The length of the garden is 1 ft longer than three times the width. Find the dimensions of the garden.

11. **Geometry.** Two angles are complementary. The sum of the measures of the first angle and half the second angle is 64° . Find the measures of the angles.

Complementary angles

12. In 2007, Nintendo Co. sold three times as many Wii game machines in Japan as Sony Corp. sold PlayStation 3 consoles. Together, they sold 4.84 million game machines in Japan. How many of each were sold? Source: Bloomberg.com
13. **Books.** The Friends of the Greenfield Public Library charge \$1.75 for used hardbacks and 75¢ for used paperbacks. Keith purchased a total of 23 books for \$28.25. How many books of each type did he buy?
14. Pepperidge Farm® Goldfish is a snack food for which 40% of its calories come from fat. Rold Gold® Pretzels receive 9% of their calories from fat. How many grams of each would be needed to make 620 g of a snack mix for which 15% of the calories are from fat?
15. **Boating.** Kylie's motorboat took 3 hr to make a trip downstream on a river flowing at 5 mph. The return trip against the same current took 5 hr. Find the speed of the boat in still water.
16. **Coin Value.** A collection of quarters and nickels is worth \$1.25. There are 13 coins in all. How many of each are there?
17. Solve graphically: $2x - 5 = 3x - 3$.
18. Determine any zeros of the function given by $f(x) = \frac{1}{2}x - 5$.
